Navigation

Displays structural context.

This navigator pattern is the same for all Initiative Elements

Each element in an Initiative has a page. Each element page presents the relevant parts of the initiative structure as navigation.

So the full parental lineage and all direct children.

Each element must have a "Tweet Descriptor" -- a summary description about the size of a tweet. Each element in the navigator displays its title and tweet.

Initiatives are structured into hierarchical layers. The number and nature of these layers are fixed. Their contents are not

Structured Content

Initiative Element contents go here.

Sections Common To All Initiative Elements

- Tweet
- Description
- Appendix
  * Notes
  * Links
  * Attention (todo, mention)
  * Discussion

Initiative Elements The Require Specific Sections

- RFC
- PR-FAQ
- OKR
- Issue
- Hypothesis
- Test

Meta Data

Displays operational context

The relevant subset of the front matter that is helpful to display here (remember all front matter is available in the markdown).

Sections common to all

- Status
- Type
- Priority
- Other constructs information (like Milestones)
- RACI summary
- tags (folks and tax onomies)

Initiative Elements with Specific Section

- RFC
- Okr
- Issue
- Test

RACI
Jtrenouth   Responsible
Sshah   Accountable

Policy   Efficacy

Process

Navigation.

Shows parental lineage and direct children of current item. In this case the current item is a Strategy. So its goal and mission are displayed above, and its tactical items dented below.

Each list item displays its layer (mission, goal, strategy, etc...) and its menu title.

Meta Data

Some of this is pulled from front matter, others inferred from related items and other still computed. Some items can be clicked for a modal that presents full details.

** Status **
Non tactical element status should be fairly crude: Active, Pending, Complete. Question is should it represent and aggregation of lower level status, or should it tickle down, or should it be independent?

** Due Date**
Milestones should define due dates. Click widget to see full list of important dates (created, assigned, changed, etc..)

** RACI **
Shows who is responsible and accountable. Click to see modal of full RACI chart
